INDUSTRY GUIDED VISITS

Hiperbaric-High Pressure Processing is the World leading manufacturer of High Pressure Processing (HPP) equipment for the food industry. From its very beginning, in 1999, Hiperbaric has been involved in the design, technological development, production and commercialization of high pressure processing equipment.

Its reliability, customer support, team work and continuous innovation due to its strong R&D&I effort, are the ingredients for a world leading high tech company.

There are operative Hiperbaric High Pressure Processing equipment in food industries of Europe, North, south, and Central America, Asia, Africa and Oceania; processing meat products, fish and seafood, fruit and vegetables, juices and beverages, dairy and all types of ready to eat meals.

For more than a century, we have devoted our energy and our competencies solely to one business.

FROM A MECHANICS GARAGE TO A MULTINATIONAL COMPANY

Grupo Antolin started its business journey as a mechanics garage (specialized in vehicle and agriculture machinery repairs) in Burgos, Spain, and run by Avelino Antolin López and his sons Avelino and José.

Today, Grupo Antolin is a leading multinational company in the development, design and manufacture of interior components for the automobile industry (Overhead, Doors, Lighting and Cockpits & Consoles). A strong and competitive company established in 26 countries in which more than 25,000 people develop their talent. Creativity, leadership and client satisfaction continue to be our core values today and are the best recipe for success in the future.

LEADING THE FUTURE OF THE INDUSTRY FROM INSIDE THE CAR

We are working hard on spearheading the transformation that the automotive industry is currently experiencing with regard to vehicle interiors by collaborating with our customers. We do so in order to develop more sustainable and technologically advanced vehicles that are also adapted to the new needs and requirements of their passengers.

As part of this transformation, Antolin is committed to a sustainable business model that focuses on and creates value for all its stakeholders, including its customers, employees, investors, suppliers, and society as a whole.

We are one of the leading interior manufacturers worldwide with over 130 plants in 26 countries. We have achieved this strong industry presence through over seventy years of working with our customers in order to develop a complete cycle of component manufacturing, from their conception and design, through the development and validation stages, to their industrialisation and sequenced delivery.
